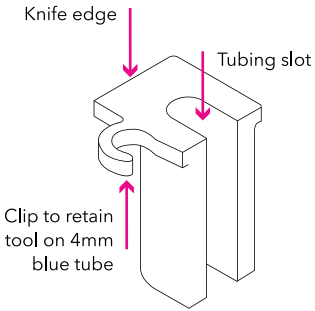
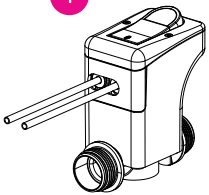
Tubing Removal Tool Guide



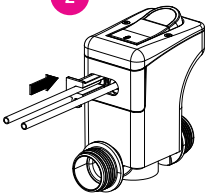
The tubing tool is required to remove the tubes from the Surestop® valve should it be required.

Please keep in a safe place or clip to the tube as shown.

1

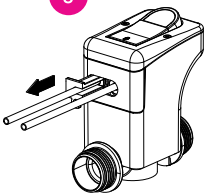


2



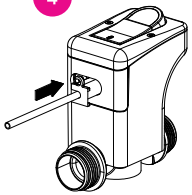
Slide the tool tubing slot around the blue tubing and push the tool up towards the valve.

3



Push and hold the tool to release the push fit and pull the tube out.

4



Slide the tool tubing slot around the second blue tube until in place against the valve and repeat step 3.
